Technical Skills

- HTML
- CSS
- Javascript
- Web API
- Node Js
- SQL
- NoSQL

Projects

Dynamic Memes

<https://tderraco.github.io/Meme-Generator/>

This was my first group project. We created a Meme Generator using HTML, CSS, Javascript and Web API's. We wanted to do something fun that would bring the user a few laughs in a world full of seriousness.

Password Generator

<https://tderraco.github.io/Super-Random-Password-Generator/>

This is a random password generator. The user follows a series of window prompts to create a random password. Some languages used is HTML, CSS, and Javascript.

Group Project II

<https://github.com/tderraco/Group-Project-II>

In this project my team and I created a calendar planner. It is a full stack application using the MVC archetype. We created our own API and added user authentication. Users will be able to create an account to add events and plan out their month.

Experience

Sharp Eye Surfboards; Manager 2021-present
